

CHERRIES

Advanced Modified Atmosphere/
Modified Humidity Packaging Solutions for
Shelf-Life Extension

Long term storage and shipment of cherries necessitates attractive, functional and sustainable packaging capable of preserving quality. StePacPPC has developed a broad range of packaging formats to meet the needs of different markets and customers.

StePacPPC offers a broad range of packaging formats to meet the needs of different markets and customers, including cutting edge, lean and sustainable automated packaging solutions:

1. **Xflow™**, a patented bulk flow-pack solution, which is the most innovative alternative to traditional preformed bags for packing and shipping cherries
2. **Xgo™** fully recyclable easy peel and resealable lidding film solutions, more sustainable alternatives to traditional clamshells

Whatever your preferred format, our modified atmosphere packaging solutions provide the optimal environment for preserving quality and freshness of fresh cherries during storage and shipment:

- ✓ Minimizing stem browning
- ✓ Minimizing decay and pitting
- ✓ Reducing weight loss
- ✓ Slowing aging

Xflow™ Roll-stock films for automated bulk packing

- ✓ Designed for high-speed and efficient packing
- ✓ Reduces labor costs compared to manual packing
- ✓ Reduces use of packaging material in comparison to preformed bulk liners by as much as 40%
- ✓ Less handling, better food safety
- ✓ Improves air-flow in storage and during shipment

Xtend® Bulk liner for long term storage & shipment

- ✓ Conventional bulk liners for manual packing of cherries
- ✓ Enable customers to store for longer and supply upon demand or ship to distant markets, knowing the berries will arrive in prime condition

Xgo™ Resealable lidding film for retail applications

- ✓ 25-30% reduction in plastic use compared to traditional clamshells
- ✓ Film seals to an APET and RPET sealing layer
- ✓ Attractive, clear, printable film with excellent antifog properties
- ✓ Extends shelf-life all the way to the consumer
- ✓ Continues to preserve quality each time the film is resealed

Xgo™ Fully recyclable MONO-PET lidding film for retail applications

- ✓ Easy peel
- ✓ 25-30% reduction in plastic use compared to traditional clamshells
- ✓ Low Carbon Footprint - 23 micrometer in thickness
- ✓ Film seals to an APET and RPET sealing layer
- ✓ Attractive, clear, printable film with excellent antifog properties
- ✓ Preserves quality and extends shelf-life all the way to the consumer

Xgo™ Fully recyclable stand-up pouches for eye-catching retail applications

- ✓ Extended shelf life in a convenient, attractive Grab-N-Go retail packaging format with ziplock
- ✓ Customizable (Width, Length, Gusset, Handle, Print)
- ✓ Attractive, clear, printable film with excellent antifog properties
- ✓ Brings value of shelf-life extension all the way to the consumer
